

STRIP CHART RECORDER

The **ECCS In-Transit Temperature Recorder** is an inexpensive, highly reliable battery powered single-use time and temperature recorder. It generates a permanent strip-chart record of temperature conditions during storage or transportation of temperature sensitive products. At destination, the receiver simply removes the chart and reviews the temperature history of the shipment.

SPECIFICATIONS

<i>Temperature range</i>	-25°C to +35°C
<i>Accuracy</i>	+/- 1.0°C
